**SUPPLEMENTARY INFORMATION:**

Title: Standards for Privately Owned Quarantine Facilities for Ruminants.

OMB Number: 0579-0232.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal Health Protection Act (7 U.S.C. 8301 et seq.), authorizes the Secretary of Agriculture to, among other things, prohibit or restrict the importation and interstate movement of animals and animal products into the United States to prevent the introduction of animal diseases and pests.

The regulations in 9 CFR part 93 govern the importation into the United States of specified animals and animal products in order to help prevent the introduction of various animal diseases into the United States. The regulations in part 93 require, among other things, that certain animals, as a condition of entry, be quarantined upon arrival in the United States. APHIS

operates animal quarantine facilities and also authorizes the use of quarantine facilities that are privately owned and operated for certain animal importations.

The regulations at subpart D of part 93 (9 CFR 93.400 through 93.436) pertain to the importation of ruminants. Ruminants include all animals that chew the cud, such as cattle, buffaloes, sheep, goats, deer, antelopes, camels, llamas, and giraffes. Ruminants imported into the United States must be quarantined upon arrival for at least 30 days, with certain exceptions. Ruminants from Canada and Mexico are not subject to this quarantine.

Regulations for privately owned quarantine facilities for ruminants require the use of certain information collection activities, including applications for facility approval, compliance agreements explaining the conditions under which the facility must be operated, certifications that the facility meets all applicable environmental regulations, requests for variance, and maintenance of certain records covering quarantine operations.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 16 hours per response.

Respondents: Owners/operators of privately owned quarantine facilities for ruminants.

Estimated annual number of respondents: 1.

Estimated annual number of responses per respondent: 4.

Estimated annual number of responses: 4.

Estimated total annual burden on respondents: 64 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 7<sup>th</sup> day of March 2012.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
